(54) SERVICE METHOD FOR DISTRIBUTING CONTENTS

(57)Abstract:

PROBLEM TO BE SOLVED: To simplify operations in a portable telephone 3, when distributing melody data for singing the incoming tone hereafter to be referred to as melody data to the portable telephone 3 from a distribution server 2, by utilizing a network infrastructure 1.

SOLUTION: A telephone number (customer ID) of the registered portable telephone 3 is associated with the model in use and is stored in the client database 22 of the distribution server 2. The model is decided by the telephone number, when the distribution server 2 is accessed by the portable telephone 3. The melody data (contents), matching the decided model, are retrieved from a contents database 21. The music name list of the retrieved melody data is distributed to the portable telephone 3. The melody data selected from the music name list by the portable telephone 3 are distributed to the portable telephone 3 from the distribution server 2. When a plurality of specifications are in a music selected from among a model which makes the melody data having a plurality of specifications of three rings or four rings as matching contents about a music of the same name, the user is able to select the specifications.
